1.2 Permissions

As a first-time user, granting necessary permissions ensures a comfortable experience:
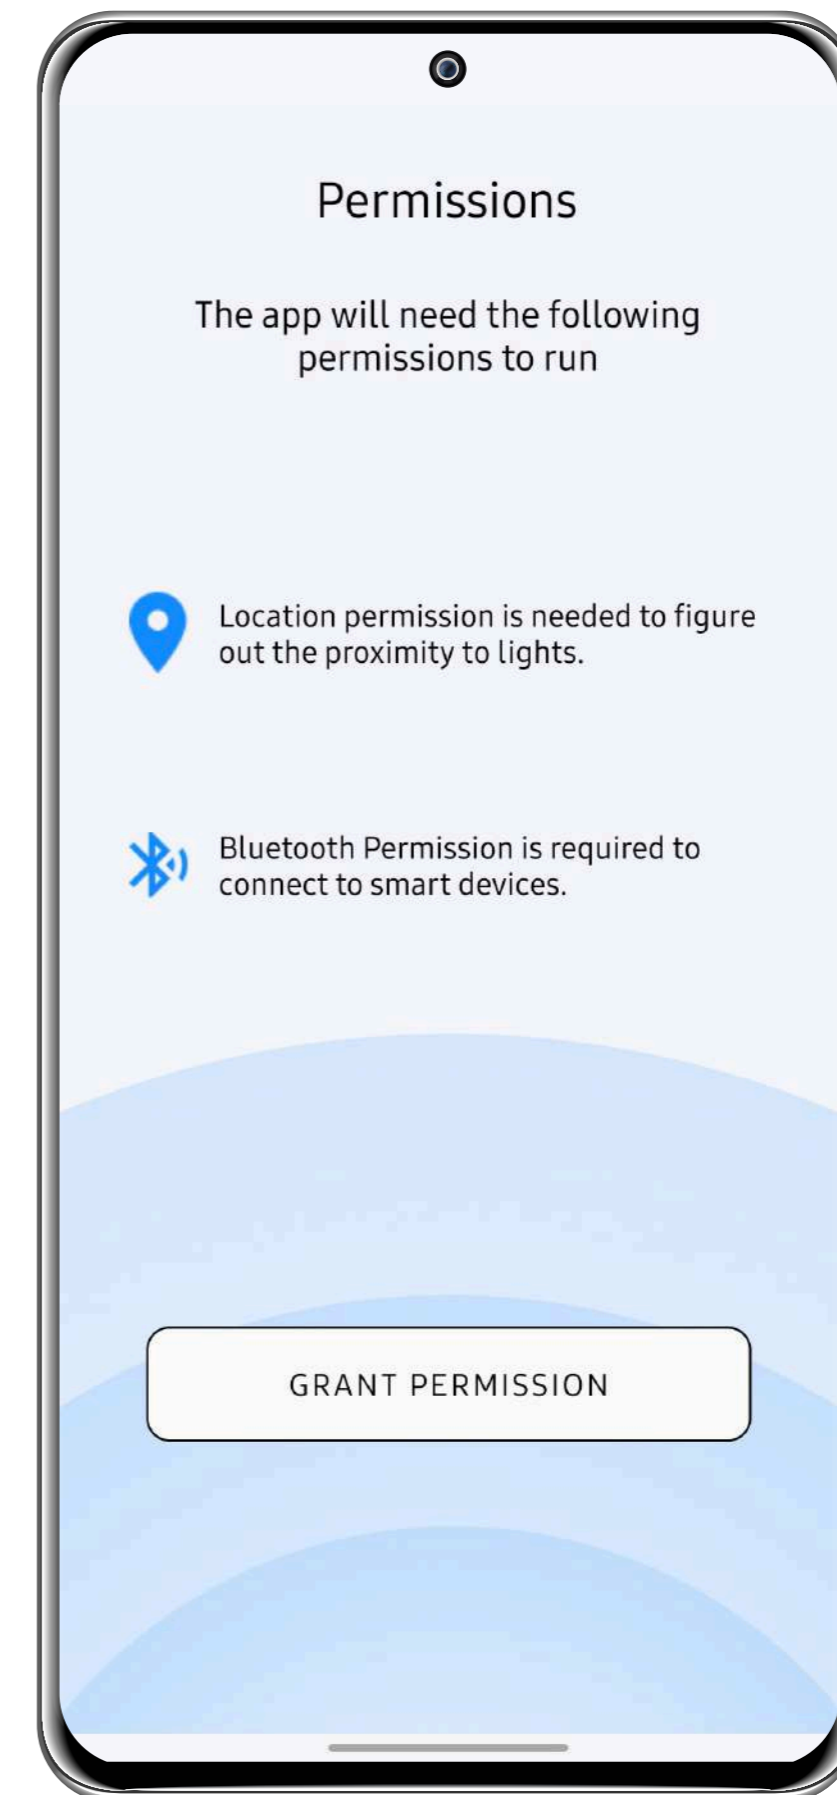

Location Access:
Provides real-time status updates of your devices.

Bluetooth Access:
Enables seamless control of all your devices

Microphone Access:
Only required for devices enabled with Rhythmic Radiance.

Permissions

The app will need the following permissions to run

Location permission is needed to figure out the proximity to lights.

Bluetooth Permission is required to connect to smart devices.

02

2.7 Switch to New Space Network

To switch to new network, follow these steps:

Option 1 :

Tap on the
Network Drop Down
Menu at the top.

Tap on Manage
Network to create
a new network.

Tap on the network
you want to switch to.

A network detail panel
will open, allowing you
to switch, edit, or delete
the network.

Tap
"Switch to
this network"
to control the
desired space.

The network will
switch to the
chosen space.

02

2.7 Switch to New Space Network

To switch to new network, follow these steps:
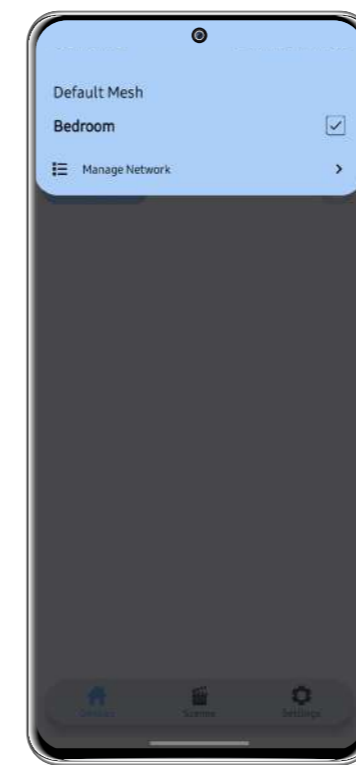

Option 2 :

Tap on the Network Drop Down Menu at the top.

The network drop-down menu shows all available networks to switch to directly.
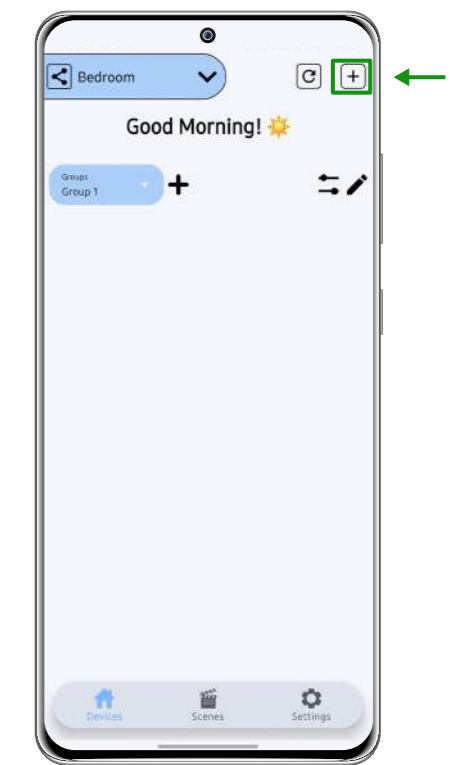

Tap on the network you want to switch to.

The network will switch to the chosen one.

The new network will appear empty as no devices are added.

Refer to Section 2.1 to Add Devices in the network.

03

3.1 Create a Scene

To create a desired scene, follow these steps:

Tap on "Scenes"
at the bottom to
open the scene panel.

The drop-down
menu appears with
all the networks.

Tap on the "+" icon
located at the top
right corner of the page.

The Scene Panel
opens up to
create a scene.

Name the
scene and tap on
"CREATE SCENE".

The scene you
created will appear
in the scene panel.

03

3.2 Edit a Scene

To edit a desired scene, follow these steps:

Tap on the
Edit Icon
in the right.

A panel with all the
devices and group will
appear with its
current saved state

Tap on the "Group"
or "Device" you want
to add in the scene.

Tap the "Save"
Button to save the
scene before using it.

The scene will be
saved with the
current state of
the devices or groups.

• Long press the Scene to open Scene Settings for Deleting Or Renaming The Scene.
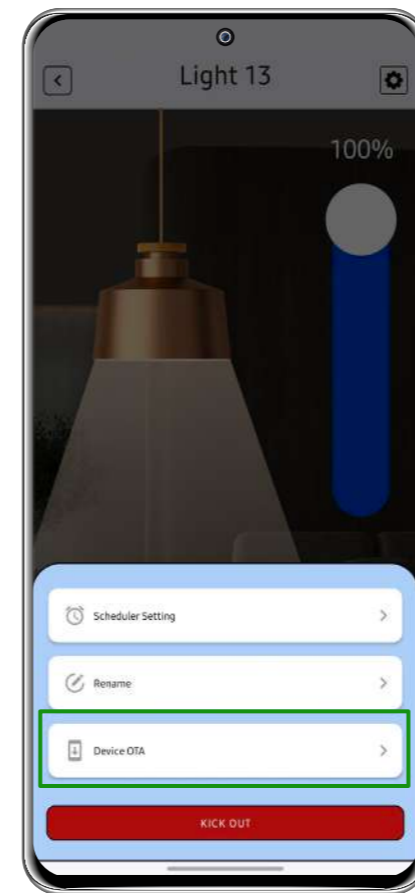

04

4.0 OTA Update

To update the app, follow these steps:

Tap on the
Device you
want to update.

The Device Control Panel
will open up. Click on
the Setting Icon.

Select
"Device OTA" to
update the Device.

Click on
"UPDATE DEVICE"
to start updating.

Once the
device is updated.
It will show as updated
with a Green Checkmark.

05

5.1 Sharing Network

To share network with other users, follow these steps:

Option 1:

Tap the "Settings" icon to open the Settings Panel.

Tap the "Share" option to open sharing options.

Tap "Export" to share your network.

A unique QR code will be generated to share the network by scanning.

Tap "Import" to import your network.

An Import Panel will open up. Tap on "Import."

• Please ensure that you have given Camera Access Permission to Import Mesh Network.

07

7.1 Music Mode
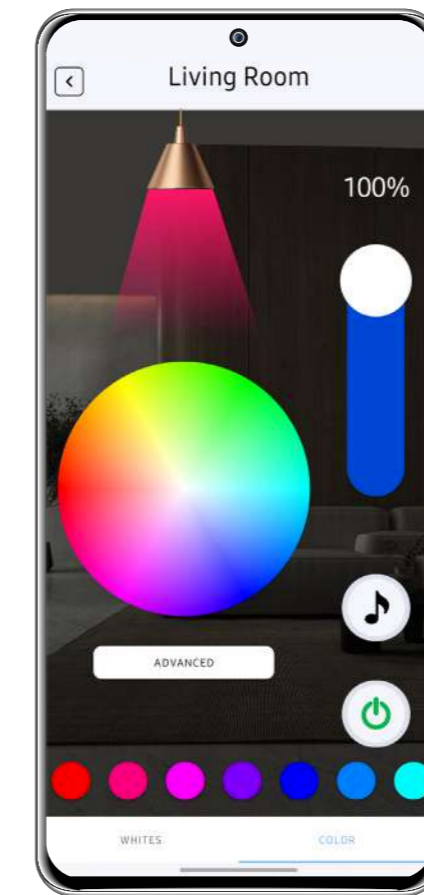

To use Music Mode, follow these steps:

Tap on the
"Control" icon to open
the Group Control Panel.

The Group Control Panel
will open up with the
Default WHITES option.

Switch to "COLOR" to
access Music Mode.

The Color Panel allows
RGB Devices to have
Music Mode Access.

Tap on the
Music Mode Icon to
Open Music Mode Panel.

• Please ensure that you have given Microphone Access Permission to Use Music Mode.

07

7.1 Music Mode
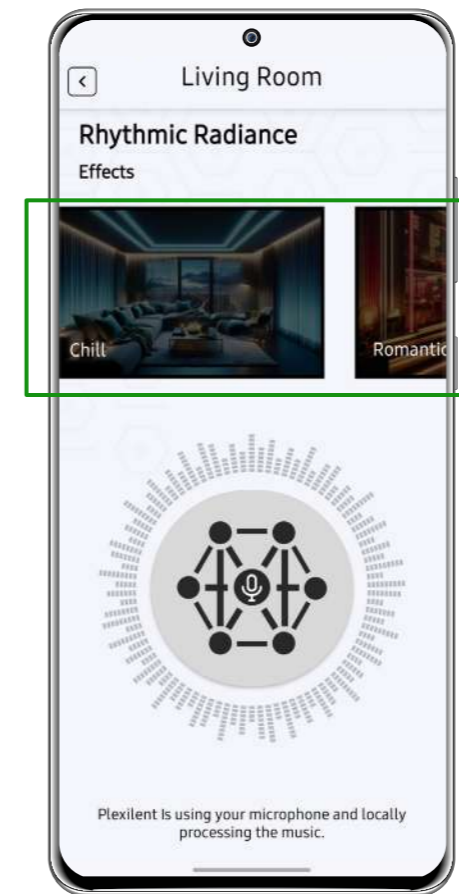

To use Music Mode, follow these steps:

The Music Mode Panel will open up with a microphone button.

Tap on the Microphone Icon to turn on the mic of the device you are using the app on.

The microphone will be turned on, and the devices in the group will react to the sounds received.

You can also choose between 5 Music Modes to create different mood ambiances.

To turn off the Music Mode, tap the Microphone Icon again. The Music Mode will then be turned off.

• Please ensure that you have given Microphone Access Permission to Use Music Mode.
